Sound installations

2022 **A mic in the dark**

Visitors are invited to enter a room with dimmed lights and to explore it through the medium of sound. They are encouraged to speak, sing, or play with objects present in the room, or even remain silent, and to listen to the background sound of the environment that they are inhabiting at that very moment. In this installation, all the acoustic traces of past and present passages are captured by two microphones placed in the ceiling and played back into the room using four speaker cones, thus triggering feedback loops that are shaped by the acoustic of the room and by any other presence in it. A dedicated SuperCollider patch handles all the signals and self-regulates the interactions by applying negative feedback criteria. "*A mic in the dark*" represents a second iteration of "*A mic in a box*".

- 12-16/12/2022 Scenkonstmuseet – The Swedish Museum of Performing Arts, Stockholm (Sweden).

2020 **A mic in a box**

A real physical space, the wine cellar of Villa Ghizzoni Nasalli in Piacenza (Italy). A specific space closed to the public and inaccessible except than virtually. The audience is invited to virtually join the room through a specifically designed website, pressing the record button and sending through your device's microphone 30 seconds (maximum) of audio into the cellar: you can speak, sing, play an instrument, scream or even remain silent, thus sending the background sound of the environment you are inhabiting now. All the traces of virtual passages will be played in the cellar and will interact live with all the elements present in there and with its acoustic footprint, as well as with all the traces of the other virtual visitors. A camera pointed at that real yet segregated space makes everything that happens in there accessible outside.

A mic in a box was part of the project *Ars Cyber != Dystopian* with Luca Guidarini and Alessandro Perini and presented at Incó_ntemporanea Festival 2020.

- 11/10/2020 00.00 am – 11.59 pm Incó_ntemporanea Festival 2020, Palazzo Ghizzoni Nasalli, Piacenza, (Italy).

2017 **Studio in tre fasi**

22 solenoids, 2 microcontrollers, cables, laptop.

This is a site-specific interactive sound installation inspired by the architecture of the porch inside the garden of the Goethe Institut in Rome. The aim of the work is to make this space musical creating a sort of sound path that is sensitive to the spectator's presence with which it tries to dialogue and at the same time suggesting a new acoustic interpretation of the chosen space.

- 17-22/07/2017 “Il Giardino dei Suoni Segreti”, ArteScienza 2017, Goethe Institut, Roma, (Italy).
- 28/12/2019 Festival “Stanze di Musica”, Casa della Cultura e delle Arti, Camerota (Salerno, Italy).

2014 **Fewy - Few Events With Ynteractions**

2 mics, 2 speakers, laptop.

The aim is to communicate acoustically with the room using the reflections on the walls of a sound material designed specifically for that space and reprocessing each time the results obtained.

- 13/11/2014 Sala Sol LeWitt, Museo Madre, Napoli, Italy.
